# ALBANY RR3000 Slim

## Slim and Compact

The RR3000 Slim features a durable, low maintenance design, delivering superior security, elegant style and smooth, simple operation with fast opening speeds of up to 80" per second. The innovative DiscDrive technology and aluminum slats offer frictionless rolling for less wear and longer door life. The RR3000 Slim is ideal for auto industry, parking garages and transportation facilities in high traffic areas.

## WHY OUR DOOR

- Low profile side frames, with a 7" width, are designed to fit in tight spaces. Smaller overall footprint reduces costs for car dealerships and customers with security applications.
- Improves productivity and help keep buildings secure with fast opening speeds of up to 80" per second and closing up to 24" per second.
- Keep traffic moving with reduced maintenance costs due to its springless design, direct drive motor and a curtain design that does not utilize rollers or hinges.
- Features rigid aluminum vision slats made to be individually and efficiently replaced, doubling as a visually appealing design and security feature.
- Offers clear, durable polycarbonate slats that provide an unobstructed view o traffic on both sides of the door for safety measures.
- Provides reliable, low maintenance operation due to its innovative DiscDrive technology and durable aluminum slats which allows for no-slat contact resulting in a much quieter door operation compared to other high-performance doors.
- Light curtain safety system automatically detects objects in the doorway, reducing accidents and extending the door's lifetime.

## Doors You Trust. Features You Can Count On.

### Easy to Maintain Slats

Slats are designed to be individually replaced for an easy and fast fix. The door can still perform with a missing slat, so there's minimal downtime for maintenance.

### No Springs

RR3000 Slim door was designed with low maintenance costs in mind, by eliminating the need for counter balance systems including springs, counter weights and straps.

### Low Profile Side Columns

Door is designed to fit in spaces with tight tolerances on side room clearance. 7" wide side columns are perfect for service write up bays and other tight parking spaces.

## TECHNICAL INFORMATION

RR3000 Slim Dimensions	Minimum Width: 7 ft Maximum: 14'0"W x 14'0"H
RR3000 Slim Vision Dimensions	Minimum Width: 7 ft Maximum: 14'0"W x 14'0"H
Operational Speeds	Opening: Up to 80 in/second Closing: Up to 24 in/second
Side Frames	11 guage galvanized steel
Manual Release	Standard, chain hoist
Disc Drive	Reduces wear, vibration and noise
Roll Cover / Motor Cover	Standard galvanized steel. Optional powdered coating
Motor	3.35 HP, 3 phase, 50/60 Hz

## DOOR CONSTRUCTION

Anodized Aluminum Slats	EPDM rubber connection
UltraLife Belts	No hinges or rollers. Door continues to operate when slat is missing
Safety Feature	Light curtain and reversing edge
Optional	Vision, insulated, or ventilated panels

## CONTROL & DRIVE SYSTEM

Control Panel	ACS100 Controller
Input Voltage	208-240 V, 440-480 V, 575-600 V
Protection	NEMA-4

We offer various options and actuation devices.

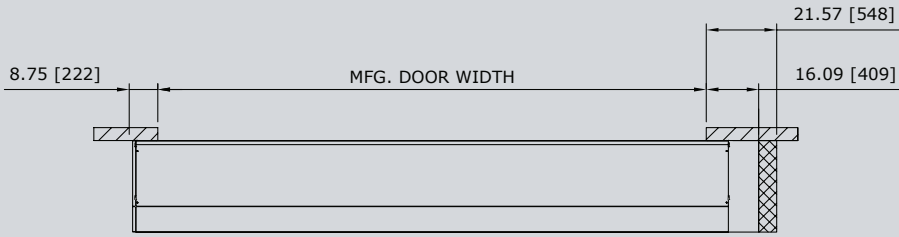

## The Albany Difference

From the inventors of the original Rapid Roll™ door, Albany High Performance Doors are strong, fast, and safe. With simplicity in design, few moving parts, and speed, our rapid roll doors maximize productivity and savings for our customers. Companies count on Albany due to our decades of experience, superior performance and products, and the global leader in entrance automation that stands behind us, 4Front Engineered Solutions.

RIGID SLIM - DIRECT DRIVE RH WITH COVERS

Founded in 1895 as Albany International in the USA, Albany began manufacturing the first high-performance roll door in 1963. Today, Albany is the world leader in the production of high-speed and high-performance doors. Providing sophisticated products that are designed for a wide range of applications in various industries, Albany remains the original high-performance roll-up door.
