ALBANY
UltraTough
TOUGH AND RUGGED PERFORMANCE

Roll up doors at your service
www.albanydoors.us
Durable. Strong. Safe.

This high performance rubber door is designed for harsh and abusive environments. The UltraTough has heavy-duty side frames, ultra-strong rubber panel, and patented windlok guide system that provides resiliency against damage and extreme weather. This door is ideal for rugged applications like mining, natural resources and manufacturing facilities.

WHY OUR DOOR

Designed to Take a Hit

- Features a tough panel and patented windlok system to withstand accidental impact, extreme weather and winds of up to 88 mph and remain operational.
- Chemical and corrosion resistant heavy-duty steel side frames are self-supporting and ensure durability in harsh environments.
- Offers an aluminum wind bar that runs along the full width of the door and is attached to the drumroll, providing high wind resistance even on larger doors by staying at the midpoint of the door during opening.

Ultra Tight Seal, Ultra Safe

- Creates a near airtight seal to help protect people and materials from exposure to extreme weather and contaminants.
- Combined with opening speeds of up to 36 in/sec, the seal allows you to increase productivity, maintain climate control and reduce energy costs.
- Lower the chances of accidental impact with optional sensing devices like photo eyes and a light curtain that reduces the chances of objects coming in contact with the door.
Patented Windlock Design
Advanced continuous windlok and guide system allows the door to resist high wind pressure of up to 88 mph. Optional wind gussets rate up to 110 mph.

Heavy-Duty Panel
Thick, 2-layer SBR and high tensile strength rubber panel features durable construction with self-supporting steel side columns and header.

Modular Industrial Design
The new and improved ACS 100 control panel features multiple activation and a streamlined system for reliable and smooth operations.

The Albany Difference
From the inventors of the original Rapid Roll™ door, Albany High Performance Doors are strong, fast, and safe. With simplicity in design, few moving parts, and speed, our rapid roll doors maximize productivity and savings for our customers. Companies count on Albany due to our decades of experience, superior performance and products, and the global leader in entrance automation that stands behind us, 4Front Engineered Solutions.

*Optional
Founded in 1895 as Albany International in the USA, Albany began manufacturing the first high-performance roll door in 1963. Today, Albany is the world leader in the production of high-speed and high-performance doors. Providing sophisticated products that are designed for a wide range of applications in various industries, Albany remains the original high-performance roll-up door.
